

AVKOPACK® 1301

CHARACTERISTICS

Gland packing braided by pure carbon fibre specially impregnated.

APPLICATION

AVKOPACK® 1301 is used for the sealing of pumps, mixers, valves, and sliders. It finds wide application in the temperature range of up to 400 °C.

The packing may be used for sealing in a broad nomenclature of chemical aggressive environments, as well as in water and steam up to 400 °C.

AVKOPACK® 1301 is widely used for sealing installations and equipment in the chemical, pharmaceutical, oil refining and food processing industries, in the power supplying industry, metallurgy, etc.

ADVANTAGES

The carbon fibre guarantees the excellent sealing properties of the packing and its high reliability of exploitation in terms of high pressure.

TECHNICAL PARAMETERS

Working temperature:	-60 °C / +400 °C
Working pressure:	
- for rotary – pumps:	30 bar
- for piston – pumps	50 bar
- for armature:	200 bar
pH:	1 – 14
V	20 m/s
Standard dimensions:	From 4 x 4 mm to 26 x 26 mm

HEALTH HAZARD INFORMATION: *No harmful effects ascertained.*
