

AVKOPACK® 1360**CHARACTERISTICS**

Gland packing braided by expanded graphite with a silicate filling.

APPLICATION

AVKOPACK 630 is specially designed for static sealing and hermetisation of immovable joints of various machines and apparatus when a resistance to high temperature is required together with a nonpermeability to gases.

The packing may be used in conditions with higher pressure than the one suitable for the dry packing.

It is a substitute of the widely used dry asbestos - graphite packing in sealing cauldron lids, sterilizes, etc.

The packing is widely used in sealing immovable joints in all spheres of industries - the chemical, the pharmaceutical, the oil refining, food processing and power supplying industries, in the metallurgy, the cellulose industry, etc.

TECHNICAL PARAMETERS

Working temperature:	+650 °C
pH:	4 – 12
Standard dimensions:	from 20 x 20 mm to 50 x 50 mm

HEALTH HAZARD INFORMATION: *No harmful effects ascertained.*

The information listed in this technical data sheet is based on our company's trials and experience. AVKO jsc is not to be held responsible for poor installation or application in media combining complexity of factors whose total exceeds the general qualities of the product. Our technical and sales representatives will assist any client in need of a product with a peculiar application.
